Telephone Board   Sally Klepper
Telephone Calling List Jennifer Fenderbosch
Garden Therapy    Bonnie Armstrong
Website           Sue Jagoda
Mentors           Jennie Jones

Civic Interest Gardens
Gazebo            Pam Hoffmann/Georganne Wolnowski
Herb Garden       Colleen Wilber
Wildflower        Anita Webb/Jennie Jones
Library Butterfly Lillian McPherson/Bev Stives
Fence Garden      Jane Kozy/ Diana Wyrock
Beach Park Point  Barbara Nahm/Marianne Stern
Walker Rd. Butterfly Sally Klepper
Old Firehouse     Jennifer Fenderbosch

President’s Message
Jennifer Fenderbosch

Plant America…Grow our Legacy

Have you heard them singing? The early morning songs of the Northern Cardinals and Sparrows greet us as the yellow winter aconite, white snow drops, and pink Lenten rose blooms. Temperatures are rising as spring creeps closer to March 20th. If you visit the Mayor’s office, you will see blooming pussy willows and forsythia in water. Rutgers University conducted a study that shows a link between flowers, mood and emotion for both men and women. There is an immediate response of happiness. They found that red flowers had a positive effect on the immune system and invigorated the recipient. Violet flowers were uplifting and stimulated creativity. Yellow flowers stimulated the memory. Orange flowers encouraged socialization. Blue flowers evoked calmness while green brought tranquility. Pink flowers stimulated the most joy while white was associated with purity, honesty, and perfection. Give yourself or a loved one an emotional lift today with fresh flowers.

GCO Flower Show School Course 1
Submitted by Jennifer Fenderbosch
Carpool to the May 20 – 22 GCO Flower Show School Course 1. It will be at the Fernald Preserve Visitor’s Center in Hamilton near Cincinnati. Design instructor will be former GCO President and NGC Master Flower Show Judge, Lynn Frank, who will be teaching Traditional Design focusing online, Line-Mass and Mass designs. Horticulture instructor will be Sue Kirkman of Kentucky who is a NGC Master Flower Show Judge and member of several plant societies. Horticulture topics will be Iris and Begonia (container grown). Download the brochure and registration form at gardenclubofohio.org or sign up at the ALGC meetings.
Joseph Massie Exhibit
Submitted by Jane Kozey
My daughter and I were lucky enough to attend the CMA Women’s Council fundraiser on December 3, 2019 at the Cleveland Museum of Art. For three decades the fund has supported the display of live flowers in the museum’s North lobby, which are changed weekly. To mark the 30th anniversary of the flower fund, Joseph Massie, renowned British floral designer presented a demonstration. Massie has earned a record 5 consecutive gold medals at the RHS Chelsea Flower Show by the age of 25. Today his captivating designs are seen and are in demand around the world. Here are some of his amazing works:

Flower Show Time!
Submitted by Jo’C Walker
We all know what time it is now and the enthusiasm is growing. Our timeline for the show is on schedule and preparation is well underway. All of the committee chairmen have been briefed and if you haven’t been personally contacted you will be soon. If you have a particular interest, it’s not too late to get on the committee. All committees can use more help. The flower design classes have been fun and there’s still time to have a few more if there’s interest, just let Jo’C know. February’s role play program, “How to Enter Horticulture in a Flower Show”, was fun and a real learning experience. Feedback was so positive we’ll follow suit with a role play at our March meeting on, “How to Entry Design and Botanical Arts Exhibits in a Flower Show”. The Flower Show Schedule will be passed out at the March meeting. Please look through it and be prepared to add your name to the signup sheets that will be available at the March meeting. Some classes will fill up fast, so if you’re interested in a particular one, quickly signup. The Entries Chairmen’s name, phone number and email address are listed in the schedule. Don’t forget about the trip to Mulberry Creek Herb Farm on March 10, 9:15am to meet at Bleser Park for carpooling. The signup sheet will be at the March meeting.
If you have any flower show questions, please contact the consultants listed in the schedule. The Flower Show will soon be here.

2020 is the year of Lantana, a luscious group of colors
Chronicle Telegram 1.26.2020 excerpt
Submitted by Georganne Wolnowski
Hats off to the National Garden Bureau for designating 2020 as the year of the lantana. It is related to the verbena and, in fact, has a common name of shrub verbena; in the last decade, the number of varieties has exploded. Keep your eyes open for the Luscious series coming from Proven Winners. This year’s Luscious Goldengate has already won!

Gardeners’ thoughts turn to spring and planting
Chronicle Telegram 2.16.2020 excerpt Ann Chanon
Submitted by Georganne Wolnowski
Every good garden starts with a plan. If you have a map on the garden from last year, pull it out. Answer these questions:
• What really grew well and what was a disappointment?
• Did the plants receive enough sunlight?
• Did the soil remain too wet?
• Did you have insect and plant disease issues last year?
• Was the garden too big for time available?
• Was the garden too small for the family’s fresh vegetable needs?
A garden is a place of life-long learning. Each spring affords a new opportunity to discover
new vegetables, make new friends and have fun with both.

**Natural Disaster USA Fund Extends a Helping Hand**
National Garden Club Submitted by Jennifer Fenderbosch

The Natural Disaster USA Fund was established by NGC in 1997 to receive monetary contributions from states, clubs and individuals for the purpose of assisting local and state clubs with their garden-related restoration efforts. This fund has helped to replant parks, municipal gardens and other garden-related sites due to natural disasters caused by floods, hurricanes, earthquakes, tornadoes, ice storms and wildfires.

Grants of up $5000 per project may be awarded in a fiscal year to local or state clubs. The application form can be downloaded from the link below. The application must include the location of the site involved, nature and severity of the disaster, proposed restoration plan by the garden club, estimated itemized cost of the project, as well as funds received from outside sources. A scale of points guideline is used for determining the grant to be awarded. Applications are to be emailed to Patricia Smith, Chairman: Grants, Natural Disasters Apply for Public Area Funds

A garden club or clubs may apply for funds to help replant, restore and beautify a public area that has been damaged or destroyed by a natural disaster, such as hurricanes, tornadoes, ice storms, floods, fires, etc.

The restoration project is to be sponsored by State Garden Club or Member Clubs. A member club may receive up to $5,000 per disaster project and may receive no more than $5,000 per disaster within the NGC Fiscal Year.

Information needed to apply:

- Proposed restoration plan by garden clubs
- Estimated itemized costs of your project
- Other funds received toward restoration project

**Highland Heights Garden Club Flower Show**
“Plant” NGC Horticulture Specialty Flower Show
May 16, 2020– 2 p.m. to 5 p.m.
May 17, 2020 – Noon to 3 pm.

**June 16th – 18th** – ALGC’s Petite Standard Flower Show— “A Magical Miniature Tour” ALL HANDS-ON DECK for volunteering with set up, take down, and exhibiting

**April is Ohio Native Plant Month**
Submitted by Jennifer Fenderbosch

Many Ohio Garden Club members worked hard to educate the Ohio Legislature about native plants to designate April as Ohio Native Plant Month. The work encourages plant nurseries to make natives more easily available to consumers. Open the latest Garden Greetings to pages 20 and 21 to review the best tree selections for wildlife, the 10 most unwanted trees and some wonderful native plant resources.
Do you remember the terrariums of the 1970s? They were often glass or plastic spheres, orbs, or giant brandy snifters, sometimes complete with macramé hangers!
The precursor to the terrarium was developed years ago (c. 1829) when Dr. Nathaniel B. Ward, an English physician with a passion for botany and entomology, discovered he could germinate spores of a desirable fern within a closed glass jar. He designed what is known as the Wardian case, a glass-topped box, resembling a miniature greenhouse, which was used to transport plants collected in distant countries back to the British Isles. Within the glass enclosure he could grow plants in conditions almost like those of their natural environment and protect them from the coal smoke-polluted air of London.

A terrarium, a garden in an enclosed glass or plastic container, is a delightful way to grow a collection of small plants. Under controlled conditions, a terrarium can also be used to help start new plants from seeds and cuttings. **About Lorain County Extension**

Submitted by Nadge Herceg

**Welcome to Lorain County Extension!**
OSU Extension, Lorain County a part of the Western Reserve Extension Education and Research Area. On this website, we will link you to news and information targeted at enhancing the life of residents in our community!

**About OSU Extension**  [https://lorain.osu.edu/about](https://lorain.osu.edu/about)

Since 1914, Extension has been helping all Ohioans build better lives, better businesses and better communities.
Ohio State University Extension brings the knowledge of the university directly to you. We fulfill the land-grant mission of The Ohio State University by interpreting knowledge and research developed by Extension and other faculty and staff at the Ohio Agricultural Research and Development Center, Ohio State main campus, and other land-grant universities – so Ohioans can use the scientifically-based information to better their lives, businesses and communities.

The Extension system is the world’s largest non-formal educational system. Extension programs address the needs of the local community while also addressing state, national, and global issues. Our practical educational programs combine the needs of local citizens and communities with new research and technical information.

No matter which county you visit, you can find people who are helped by the four major OSU Extension program areas: family and consumer sciences, 4-H youth development, community development, and agriculture and natural resources. These program areas – and many other special topics – are continuously evaluated and updated to meet the changing needs and issues facing each community. Extension provides practical advice, sensible solutions, and realistic down-to-earth answers for ALL Ohioans.

**OSU Extension is...**
**Our mission:** Engaging people to strengthen their lives and communities through research-based educational programming.
**Our vision:** OSU Extension is a dynamic educational entity that partners with individuals, families, communities, business and industry, and organizations to strengthen the lives of Ohioans.
